Dear Customer,

You have made an excellent decision in opting Rieter maschines.

Our after-sales service will do everything possible to make sure that you have no cause to regret your decision during the years to come.

Please use only original Rieter spare parts. These are always state-of-the-art and are your guarantee for first-class material and processing. Please also note that we offer no guarantee for damage to maschines if this is related to spare parts or retrofits that have not been obtained direct from us or through our authorised agents.

Notes on How to Use the Catalogue

In order to ensure rapid delivery of spare parts, please take note of the given general information.

Important information

In the parts list, in the column "Remarks“, you will find the code P or G. On the drawings you will find the symbol with the eye, or further instructions.

Tag	Meaning	Explanation
P	Recommended spare part	Preventative stocking of the most important spare parts for safeguarding your production is a calculable risk for you. Therefore, we have marked the most important spare parts for your machine with this identifier. Benefit from our experience, and your Rieter Parts Service will provide a quotation for these recommended parts, on request.
G	Limited guarantee	Timely replacement of parts that are subject to normal wear and regular maintenance, will ensure a high degree of utilisation of your machine. As agreed in section 12.5 of the General Terms and Conditions of Purchase and Delivery, the guarantee is excluded for damage that is caused by continued use of wear parts or inadequate maintenance, and for the parts themselves, which must be replaced due to natural wear.
👁 110	Cross-reference	Connection parts with this assembly can be found, for example, in Chapter 110.
👁 Option	Cross-reference	Additional material numbers corresponding to this catalogue number can be found with other parameters in the Appendix Option.
↻ 180°	Note	The assembly is depicted rotated 180°.
L 001 / R 002	Note	Catalogue number for left side of the machine (z. B. L 001) or right side of the machine (z. B. R 002).
